

# E-Line Dump Bailer (EDB-300)

The Electric Line Dump Bailer controls the release of cement, acid, plastic or other material in the wellbore without the use of explosives. The **EDB-300** is the “**SMART**” and safe way to release cement to plug a wellbore by using innovative technology. Control operation from surface panel. **EDB-300** can be run in conjunction with CCL for correlation.

## Benefits

- ◆ **NO EXPLOSIVES NECESSARY**
- ◆ Easily crosses over to different size bailer barrels
- ◆ More runs in a shorter time period
- ◆ Ability to cross over to multiple sizes of bailer barrels
- ◆ Surface control of downhole dump
- ◆ Short length
- ◆ No re-wiring in between runs

Operating Temperature	32°F to 302°F (0°C to 150°C) *
Diameter	1.38" (3.5 cm)
Length	57" (1.5 m) (Plus Bailer Barrels)
Weight	16 lbs. (7.26 Kg)
Maximum Pressure	15,000 psi (103,000 kPa)
