

Buffer Carrier

The HT-7502 Buffer Carrier is a versatile carrier which houses two (2) $\frac{3}{4}$ " Memory Pressure Gauges (HT-750). The gauges are housed in an Exotic Stainless Housing to protect the tools and your data from H_2S and CO_2 . The liquid-filled housing allows you to get accurate data when in harsh conditions, reduce the shock seen by the tools as well as reduce vibration seen by the tools. This $1\frac{1}{2}$ " carrier is Small, yet Strong and Durable enough for your test.

Carrier Benefits

- Protection against Harsh Chemicals
- Mechanical Protection to Memory Tools to protect your data
- Reduced Shock & Vibration effects on the Tools
- Houses Two (2) $\frac{3}{4}$ " Memory Pressure Gauges

Carrier Dimensions
