

4 Gauge Bundle Carrier (MC-4400)

The **MC-4400** memory gauge bundle carrier is utilized when your job application requires pressure and temperature data acquisition during completion operations such as drill-stem testing (DST), tubing conveyed perforating (TCP) and frac packing.

The **MC-4400** is tough and reliable. It was designed to protect the **Micro-Smart** HT-750 memory pressure gauges from the severe environment associated with completion operations.

The carrier houses four (4) **HT-750** gauges. Each gauge is secured in place with retaining screws.
